Group	How well did the invention concept focus on the context of their specialization?	<p>1 Point - Did not focus on the specialization.</p> <p>2 Points - Focused on the specialization, but on a surface level or in an overly generalized sense.</p> <p>3 Points - Focused on the specialization in a general sense.</p> <p>4 Points - Focused on the specialization in the appropriate context. Considered the constraints well.</p> <p>5 Points - Deeply focused on the specialization in the context and considered the constraints well. Displayed exceptional critical thinking or innovation.</p>
	How well were the constraints of the specialization explored?	<p>1 Point - Did not list 3 constraints, or explored problems unrelated to the context.</p> <p>2 Points - Listed 3 constraints, but only partially related to the specialization.</p> <p>3 Points - Listed 3 contextual constraints related to the specialization.</p> <p>4 Points - Listed 3 contextual constraints that demonstrated an understanding of the challenges of the specialization.</p> <p>5 Points - Listed 3 contextual constraints that deeply considered the challenges of the specialization.</p>
	How ecological is the invention/action.	1 to 5 points
	How original is the invention/action.	1 to 5 points
	Perspicuity of the presentation/speech	1 to 5 points
	Quality of material used at the presentation/speech.	1 to 5 points
	Total
